ROAD MARKINGS
Permanent & Temporary Contracting Services

www.wj.uk
The UK’s largest independent specialist road marking company

Introduction

WJ is the UK’s leading provider of award-winning road markings, specialist highway products and services with extensive experience in the industry. Road Markings are our core specialist business and we consistently provide high standards on a national basis whilst also ensuring delivery of unrivalled local service from strategically located group businesses and UK depots.

People, client and supplier relationships are our strength and together we have evolved WJ into the most successful innovator, manufacturer and provider of road markings within our industry.

We support our operations with research & development for continuous improvements.

WJ are members of industry associations, RSMA, HTMA, TMCA and RSTA and award winners for delivery, innovation and health & safety initiatives.

Standards

- ISO 9001 Quality standard and certified Sector 7 National Highways Sector Scheme
- ISO 14001 environmental management – Stoke Depot
- Chas accredited for safety
- Compliant with BS EN 1871 physical properties, BS EN 1436 road performance and BS EN1443 road studs
- Fleet Operator Recognition Scheme (FORS)
- Achilles Building Confidence risk management and best practice
- Gold Status Supply Chain Sustainability School

Road Marking Resources

Specialist Road Marking Fleet

WJ invest heavily in vehicles and own the most advanced and modern fleet within the road markings industry.

WJ operate in excess of 120 LGV specialist road marking vehicles from major Multimark applicators, sprayers, extruders and Hydroblast removal machines through to studding trucks and screed vehicles.

Engineering Manufacture

WJ’s road marking trucks are designed and built by our group engineering division to ensure the latest ideas on safety, environment and efficiency are incorporated within a continuous improvement plan.

Vehicle designs are supported by Computer Aided Design (CAD) technology and manufactured to conform to the Individual Vehicle Assessment scheme (IVA).

Product Manufacturing

Product innovations are driven by our research & development activity aligned to the needs of clients and other stakeholders.

The production of high-performance materials is carried out within a quality controlled environment in our modern manufacturing facility.

People

Our people are our strength with long serving qualified employees possessing vast experience we provide the largest directly employed UK force of highly skilled and specialist road marking operatives.

Resourcing and delivery of major schemes is assured by dedicated permanent night working crews.

Training

WJ have an established driver training academy and DVSA approved training centre whilst also supporting the RSMA apprenticeship scheme.

Plant Maintenance

Operations are supported by 24-hour depot and / or highly qualified mobile vehicle technicians.
Road Markings Services
WJ are a specialist marking contractor for highway agency asset support contracts, construction & framework contracts, local authority roads, resurfacing schemes, airport, rail, car park, factory, sports and school playground projects.

Permanent Road Markings
WJ provide a full range of permanent marking solutions with the flexibility for small works on local authority roads or car parks as well as to fully resource major schemes on motorway and trunk roads.
- Thermoplastic screed, spray, extrusion and raised profile markings
- Advanced durable waterborne and solvent paints
- Methyl Methacrylate (MMA) cold plastic
- Preformed Markings
- High friction & safety surfacing

Weatherline High Performance Range
- Weatherline high performance screed & extruded thermoplastic for higher retroreflectivity, luminance and skid resistance values
- Weatherline+ dot ‘n’ line system for enhanced wet night visibility
NB Weatherline+ can be used to upgrade existing markings. Weatherline is an award winning road marking.

Temporary Road Markings
Covering the whole of the UK WJ is the market leading provider of temporary road marking services utilising specially developed and constructed vehicles.
- Serving both large & small contractors we provide our extensive client base with unrivalled service.
- Advanced drying equipment allows for temporary tape and stud work to be carried out during inclement weather conditions.

Road Studs
WJ supply and install a full range of permanent and temporary road studs in line with the requirements of BS EN1443.

Installation services include:
- Traditionally milled cats eye
- Roadcraft 301 inset
- 3M™ 290 surface applied
- Armour studs
- Temporary road studs
- Non reflective pedestrian crossing studs

State of the art equipment & highly skilled operatives within a collaborative culture

Allux Reflecting Road Marker
Allux is a complementing high performance aluminium road stud incorporating proven proficiency of a durable polycarbonate lens system featuring microprismatic optical technology.

Scabbling
The skid steer machines have various attachments so that markings or studs can be scabbled off in a quick, reliable and proven method of removal.

Hydroblast
The Hydroblast ultra-high pressure water system offers a unique level of versatility and performance with little or no damage to road and pavement surfaces.

WJ operates a fleet of Hydroblast 8000 and Hydroblast 4000 removal machines for efficient removal of road markings.

A patented vacuum recovery system ensures that particles do not dissipate into the atmosphere or enter the water course and leaves the road clean and virtually dry.

Specialist Markings
WJ provides an extensive range of specialist marking technologies and contracting experience for large or small highway and non-highway applications.

Road Studs
- Roads
- Airfields
- Car parks
- Factories
- School playground and sports facilities

High Friction and Safety Surfacing
BBA approved high friction surfacing installer
WJ are a BBA HAPAS approved installer of both hot and cold applied type 1 high friction surfacing meeting the requirements to clause 924 of the specification for highway works.

WJ provide clients a full package of solutions when it comes to traffic calming and road safety. We manage schemes from conception to completion that include high friction surfacing, coloured surfacing, road marking and road studs throughout the UK.

WeatherGrip
WeatherGrip is an innovative coloured surfacing system providing durability, ease of application, and a flexible design functionality for demarcation, traffic calming and high skid resistant applications.

WeatherGrip can be installed quickly in reflective or non-reflective options whilst levels of skid resistance are modified to afford a surfacing designed for a specific functional use and application.
