

# Dynamic Reflectometer surveying service

Accurately measure the safe performance of your road network markings

**WJ is the UK's leading provider of award winning road markings, specialist highway products and services with extensive experience in the industry**

Road marking material manufacture and specialist application of markings are our core business activities.

Providing high standards on a national basis, we ensure delivery of unrivalled local service from strategically located UK depots.

## What the WJ survey service offers:

- Utilising state of the art, Dynamic Reflectometers, the WJ surveying service allows clients to efficiently review performance of retroreflectivity in line with the requirements of TD 26/07 Chapter 2 Road Markings, Annex A.
- The survey can measure the retroreflectivity of all types of road markings, with or without aggregates, including thermoplastic, paint, marking tapes and cold plastic materials whether they are smooth, textured, profiled or coloured.
- Using bespoke Retro Vehicles, road markings are surveyed at normal traffic speeds. Unlike portable devices, the Dynamic Retroreflectivity System is ideal for surveying extensive road networks including motorway and trunk road whilst maintaining safety best practice.
- A full detailed report is provided on completion.

## Key features:

- Measurement of the night visibility at any time of the day or night due to ambient light supervision.
- Integrated camera for road surveillance with picture sequence every 25 metres, plus the option of manual or automatic picture taking of special features.
- Verbal comments can also be recorded in addition to the special features.
- Equipment calibration is fast and simple.
- Can be mounted on either side of the vehicle.
- Measurement of markings with profiles up to 9mm.
- All important data recorded at the same time including integrated temperature; humidity measurements; day contrast ratio and GPS coordinates.
- Ability to capture and count active Cats Eyes.
- Data outputs into Microsoft Excel, allowing easy statistical analysis of the data.
- Easy to understand reporting.
